CATALOGUE
GUNS FOR GENERATIONS

EDITORIAL

For 267 years now, Germany's oldest manufacturer of hunting firearms – J.P. SAUER & SOHN – has provided hunters with guns boasting uncompromising quality, utmost precision and timeless beauty. This winning formula has inspired as many as eight generations of huntresses and hunters thus making Sauer one of the world's leading manufacturers of hunting guns. Our unique heritage is no matter of chance, it is built on the honest work of responsibly acting people who are proudly committed to their roots, always strive for continuous innovation and preserve what is best.

When I am out hunting with my side by side shotgun from 1898, every mechanical and artistic detail makes me feel the passion and dedication, with which our ancestors have lived up to these values and laid the foundation for the philosophy of Sauer & Sohn. Now as back then, Sauer hunting firearms are not a temporary phenomenon – they are guns for generations.

In this spirit and on behalf of the Sauer team I wish you a pleasant read and always good hunting.

J.P. SAUER & SOHN
ESTABLISHED 1751

SAUER 404
THE NOBLE DIFFERENCE

With the bolt action rifle Sauer 404, J.P. SAUER & SOHN proudly presents the refined distillation of concentrated practical knowledge and 21st century technology that has been built upon the foundation of nearly 270 years J.P. SAUER & SOHN history.

The flagship of our product range epitomises no more and no less than the essence of our historically successful bolt action rifles. Like no other, the S 404 corresponds to the highest demands in terms of safety, precision and flexibility – today and in the future. It yet remains, what you neither can deny nor conjure up, only see, feel and sense: a timelessly beautiful bolt action rifle that has grown over generations and that is made for the generations to come.

This is perfection in its most elemental form or briefly:
a real Sauer.

SAUER 404 – THE NOBLE DIFFERENCE

INGENIOUSLY SIMPLE – SIMPLY INGENIOUS

The Sauer SUS universal key appears at first glance to be no more than a detachable fore-end sling swivel. Upon removal it is revealed to be a super stable German-made folding allen key that is essentially responsible for the individualisation of your Sauer 404. As an onboard tool that is attached to the rifle sling, it can neither be forgotten nor get lost – thus providing utmost flexibility at all times.

ADJUST, KNOW, SHOOT

An adjustable trigger featuring four different trigger pull weights that are individually adjustable, is the perfect answer to the physiological effect chain of knowledge and acting. Would you ever go without the magnification scale on your variable rifle scope? Crisp 550, 750, 1 000 or 1,250 g (1.2, 1.6, 2.2 or 2.7 lb) leave no doubts that you are programmed for success already prior to taking your shot.

16 CALIBRES – ONE PROMISE

By introducing the Sauer 200 in 1985, J.P. SAUER & SOHN has laid the foundation for the nimbus of unsurpassed precision. The key technology: Three clamping bolts in the receiver hold the barrel tension-free and six massive bolt lugs positioned directly behind the chamber lock the bolt. For more than 30 years now, this has been the formula for the easy interchange of barrels and calibres while providing match grade precision at the same time. A promise that will persist in the S 404 – for generations.

IT IS YOUR GUN AFTER ALL

Every successful competition shooter knows: Only the optimum position of the shooting finger on the trigger blade provides proper trigger pull and controlled shooting without the risk of missing the target. With an 8 mm (0.3") adjustment range for length of pull and a left-to-right swivel range of 5 degrees, the S 404's extra-wide trigger blade guarantees each shooter optimal contact to reliably hit the target.

SAUER 404 – THE SUBTLE DISTINCTION

MANUAL COCKING SYSTEM WITH SAVVY

The ergonomically perfect metal cocking slide on the bolt shroud allows the rifle to be cocked both comfortably and extremely silent. By pressing the button with the thumb, the cocking slide silently slides back into the uncocked position. In addition it is also possible to load and unload the rifle in the uncocked position: To do so, simply slide the cocking slide 2mm forward and safely open the bolt.

PERFECT ALLIANCE

The S 404's specially designed Sauer Universal Mount (SUM) combines an extremely low and elegant profile with absolute shooting stability and return to zero. This ensures that the shooter can focus on the target at lightning-fast speed and does not need to lift his head in order to use the full potential of accuracy. The SUM is available for all common mounting rails as well as for all ring diameters from 1 inch to 40 mm.

PLAY IT SAFE AND GO FOR MODULAR

Meeting your friends after hunting – do I leave the rifle in the car? Danger ahead? Not with the S 404. In just two simple steps the bolt head can be separated from the bolt body and conveniently disappears in your pocket. Firing the rifle therefore is totally impossible. Changing the bolt head for different calibres is just as safe and easy. This means: safety and modularity are combined the smart way.

SIMPLY PERFECT

The perfect magazine lock must effectively prevent the unintentional unlocking of the magazine in any situation. The perfect magazine lock must be positioned where the magazine is operated – directly on the magazine button. The perfect magazine lock must be unlocked at lightning speed so that a full magazine is instantly available when the situation becomes critical. The perfect magazine lock is called the Sauer MagLock.

S 404 ELEGANCE

Confidently stylish, serene and masterful. The superior concept of the S 404 paired with a deluxe grade 5 walnut stock offers a timelessly beautiful bolt action rifle of technical and artistic perfection to the true aficionado.

S404 STUTZEN SELECT

No other bolt action rifle epitomises traditional hunting as tasteful as a Stutzen. Yet no other bolt action rifle holds similar challenges when it comes to constant precision in all climate zones and over decades. What until recently has been close to the impossible, Sauer & Sohn has solved by integrating a one-of-a-kind Carbon Spine technology – an ultra accurate and under all conditions ultra reliable hunting rifle in the classic design of a full-stock beauty.

The carbon sandwich construction in the fore-end avoids twisting and warping of the wood in wet conditions and/or during temperature changes. This ensures constant precision over generations without any compromise of design.

S 404 SELECT

The S 404 Select boasts an individual premium look. The incredibly realistic laser grain on the classic walnut stock is an absolute eyecatcher and the perfect entry into the luxury class of J.P. SAUER & SOHN.

S 404 CLASSIC

The classic wood and metal design leaves no room for doubt that the owner of an S 404 Classic believes in the values of traditional gunmaking.

S 404 ARTEMIS

Already when mounting the S 404 Artemis for the first time, this premium rifle for huntresses gives you the absolute confidence of shooting instinctively and hitting safely. It boasts a shorter stock that is optimised around the pistol grip to perfectly provide both control of the rifle and optimal trigger contact. In addition, the S 404's trigger blade can be adjusted individually. This intelligent feature ensures that not only a smaller women's hand but above all the finger length is optimally taken into account. Thus, a customised solution is born that embodies the pure joy of hunting.

S 404 SYNCHRO XTC

The S 404 Synchro XTC perfectly shows how timeless gun making with cutting-edge materials is done. The handcrafted stock made of meticulously laid carbon fibres gives the Synchro XTC its extremely low overall weight of only 2.7 kg (5.9 lb) and provides, in combination with the fluted barrel, optimum balance. At the same time the shock-absorbing carbon considerably reduces the recoil.

The infinitely adjustable comb brings the thumbhole stock to perfection. This concept is a major part in comprising all elements that are paramount to taking aim confidently and pulling the trigger perfectly

S 404 CLASSIC XT

The uncompromising all-rounder for all requirements and every hunting situation. Modular, ergonomic, precise and functional like any other S 404, the Classic XT convinces with its absolutely robust and aesthetic polymer stock.

S 404 SYNCHRO XT

All the advantages of the Classic XT are complemented with the S 404 Synchro XT by a thumbhole stock with adjustable comb. This rifle not only promises its owner a maximum in ergonomics, stability and shooting comfort but also keeps this promise in any situation.

PISTOL GRIP HEATING SAUER ERGO HEAT

Be it sitting on a high seat during the winter or on a driven hunt – hunters often have to fight the cold. Many hunters do not wear gloves at all on the shooting hand in order to be ready to shoot quickly. Shooting with cold fingers is extremely counter productive. The tactile sensation of the fingers is reduced, their sensitivity gets lost. A shot at a winter fox at 100 metres is missed because the hunter pulls the shot. With a Sauer ERGO HEAT pistol grip heating the fingers of the shooting hand remain warm, so that the index finger can properly pull the trigger even in icy cold conditions. With sub-zero temperatures on a driven hunt the hunter can comfortably hold his Sauer rifle with a bare hand on the warming pistol grip, take aim faster as well as cock, shoot and reload the rifle with the sensitivity required. After that only the hits count!

The Sauer ERGO HEAT app is available for Android from version 4.3 as well as iOS 7.0

Simplest operation

- 3 heating levels can be set using the supplied remote control or the free Sauer ERGO HEAT app.
- A subtle red LED light in the sling swivel shows the selected heating level by blinking.
- At the highest heating level, the rechargeable battery lasts for about 2 hours, at the lowest, up to 7 hours.

- Charging the batteries in the stock is done using a power supply which is integrated in the sling swivel bushing.
- You can also use the cigarette lighter, the USB connection of your car or a powerbank to charge the batteries.

SAUER 404 CARBON FLEXPPO BIPOD

STABILISING LIGHTWEIGHT

The Sauer Carbon FlexPro Bipod was especially designed for long-range shots with the S 404. It can rapidly be attached via the front sling swivel bushing to provide absolute stability and utmost shooting comfort.

The best thing about it however is: The handy lightweight can easily be folded and carried on the rifle when locked. Furthermore the carbon bipod can completely be removed from the fore-end at the touch of a button and stowed in the backpack.

SAUER 404 SILENCER TITANIUM PRO

LIGHTWEIGHT AND SILENT

Like no other, the Titanium Pro silencer combines quality, performance und practicality. Thanks to its ultra lightweight titanium core, it is not only indestructible, but also hardly perceptible when being mounted on the rifle. Yet, you will noticeably feel its noise-reducing effect when shooting.

Because of its practical, tool-free disassembly, the Titanium Pro silencer can be cleaned very easily. Its streamlined shape does not only give the silencer its elegant look but also turns it into a reliable companion even when the going gets tough. You will not even get caught on small branches while stalking. The Titanium Pro is not more and not less than the perfect combination of form and function.

ABS COMPACT CASE I

Its thought out modularity makes the Sauer 404 the perfect travelling companion. Especially for this purpose we have designed a perfect and inconspicuous transport case with extremely handy dimensions of only 83x16x12 cm (32.7x6.3x4.7").

ABS COMPACT CASE II

You cannot transport two firearms more comfortable or discreet than with the ABS Compact Case II. Featuring outer dimensions of 83x24x13 cm (32.7x9.4x5.1"), the Compact Case II provides ample space for one firearm including interchangeable barrel and second rifle scope as well as the Titanium Pro silencer and the Flexpro bipod.

SAUER 404 CASES COMPACT COMPANIONS

An ingenious rifle has deserved an ingenious case that perfectly combines maximum protection, minimum dimensions and an elegant design. No matter which model you choose – these beautiful and practical companions are only outperformed by their content.

CARBON COMPACT CASE

The carbon case is a true high tech statement when it comes to technology and design. It is not only a must-have for the owner of a S404 Synchro XTC, but also for those enjoying the best materials and a premium look.

Smart solution: All S404 cases can be carried comfortably over the shoulder using the rifle sling. Simply click in the sling swivels – and you are ready to go.

J.P. SAUER & SOHN
ESTABLISHED 1751

ATELIER 1751

“The golden eye of the feline predator vibrantly stands out from the trigger guard, a leopard rests on a tree framed by acacia sprigs spreading all over the receiver.”

You probably cannot improve a bolt action rifle by J.P. SAUER & SOHN technically but every rifle can become a personality. According to this claim the ATELIER 1751 by J.P. SAUER & SOHN knows almost no boundaries to fantasy and design when it comes to your individually manufactured rifle.

SAUER 404 AT THE TREESTAND

The realistic depiction of game in its natural surroundings is an artistic skill only master engravers are capable of in perfection. The ATELIER 1751 exclusively works with the best in their field in order to create artworks like this leopard engraving. The background which is inlaid in gold and delicately shaded, the feline predator dozing on the tree as well as all further details and the graphic overall design are the true proof that a hand-engraved Sauer & Sohn is right at the top when it comes to the so-called league of "Best Guns".

EXCLUSIVE DETAILS

An exclusive bolt knob or an inlay with initials framed by timeless english scroll or oak leaves are a sign of exclusive customisation. There is more to a hunting rifle than being just a mere tool, every single one of them is a personal companion for generations.

* incl. 2-3 initials (laser engraving)

Individualise your S 404 with a titanium nitrided bolt head or eternalise your name on the barrel root ring between receiver and barrel. This is how a S 404 will become your S 404.

Find further information on all customisation options at www.sauer.de

FLAMES, CLOUDS, BIRDS EYES

Nothing else makes your hunting firearm more unique than an elegant stock. Every single of these one-of-a-kind masterpieces fascinates the heart and the eye of each hunter through a formidable interplay of colour, pattern, light and shadow that has matured for centuries. In the ATELIER 1751 of J.P. SAUER & SOHN you can make your dream come true.

J.P. SAUER & SOHN
ESTABLISHED 1751

SAUER 101
TRADITIONAL COMMITMENT

The Sauer 101 is the premium rifle for hunters who prefer a classic firearm without a modular system but do not want to forego the legendary Sauer characteristics like precision, smooth bolt operation, reliability and perfect balance.

Completely designed in traditional style, the S101 is nevertheless packed with unique details inspired by the Sauer premium class. A rifle was born which will still inspire our granddaughters and grandsons.

S101 GTI

The S101 GTI is at the top of its class when it comes to ergonomics. The crucial detail for relaxed and accurate shooting is its height-adjustable comb. This means ideal alignment of the eye and the rifle scope, relaxed posture of the hand and optimal trigger pull. In addition the S101 GTI comes with further top features like a barrel with muzzle thread, detachable sling swivels as well as a bipod adapter.

S101 ARTEMIS

The optimum stock dimensions for ladies are the heart of the S101 Artemis. Compact stock length, a sleek pistol grip and a reduced distance between trigger and shooting hand form the three pillars on which the perfect fit for huntresses rests. Not only the stock but the whole setup is designed to impress. Thanks to the 51 cm barrel the Artemis captivates with its outstanding balance at an overall weight below three kilograms.

S101 CLASSIC

As the name already suggests, the S 101 Classic is the classic entry-level model into the S 101 family. Due to the sleek lines of its full stock made of walnut burl and its elegant Schnabel, the S 101 Classic reflects the tradition of timelessly beautiful hunting rifles from J.P. SAUER & SOHN.

S101 SELECT

Featuring a modern laser grain on the walnut stock and a traditional jeweled bolt body, the S101 Select is the perfect example for the elegant bond of solid gunmaking and revolutionary wood processing.

S101 FOREST

The powerful Forest is inspired by boar hunting. With the proven technology of the S101 series, its compact dimensions as well as its fantastic balance, it is the perfect rifle for tight high seats or small stands on a driven hunt.

S101 FOREST XT

In addition to the characteristics of its twin sister, the XT version of the S101 Forest convinces through excellent balance and compact dimensions. But above all, it is the robust polymer stock that also offers dog handlers their money's worth.

Fig. shows optional extras

S101 CLASSIC XT

When you can no longer improve on technology, all that remains is to protect it even better. The rugged polymer stock of the S 101 Classic XT defies all adversities and provides a secure and silent handling thanks to its Soft Touch Coating.

S101 CLASSIC XTA

The successful characteristics of the S101 Classic XT are complemented by the Classic XTA with the height-adjustable ERGO MAX comb. The stock's height can be adjusted individually to the hunter's needs and allows for the perfect alignment of the eye to the reticule of your scope.

J.P. SAUER & SOHN
ESTABLISHED 1751

SAUER 100
THE BEST OF ITS CLASS

Besides reliability and best craftsmanship, the S 100 combines all necessary characteristics of a contemporary hunting rifle from J.P. SAUER & SOHN. Everything is just right: performance, quality, price.

With the S 100, J.P. SAUER & SOHN has raised the standard for entry-level bolt action rifles to a whole new level. Its compelling features like the adjustable single-stage trigger, a three-position safety, the cold hammer forged barrel, Sauer's famous smooth bolt motion and the elegant and ergonomic stock geometry inspired by the successful S 404 and S 101 bolt action rifles make the S 100 the measure of all things in its class.

S100 PANTERA

Maximum performance, optimum presentation. Due to its ergonomically perfect laminate wood stock with rugged black mil-spec coating, the S100 Pantera is considered to be the precision flagship of the S100 range.

The height-adjustable polymer comb as well as the recoil pad which is adjustable sideways and in height provide an absolutely relaxed shooting position when it comes to combining handling and precision.

S100 FIELDSHOOT

Target shooting or varmint hunting: The new S 100 Fieldshoot is the perfect choice when maximum focus on the target is paramount. From the outside the rifle captivates through a laminate wood stock with a dark oil finish that can be adjusted individually to the shooter's needs. In addition, the 620 mm (24") long Varmint Match barrel with 22 mm (0.86") taper makes the Fieldshoot a precision-guarantee for long-range shooting and long shooting series.

S100 CLASSIC

The Classic is the tasteful entry into the world of the S 100. The robust DURA-BEECH wooden stock and the matt burnished barrel surface give this rifle the appearance of a traditional tool.

S100 CLASSIC XT

Quality made in Germany, precision made by Sauer: Featuring a handy and robust polymer stock, the S 100 Classic XT offers an unrivalled price-performance ratio.

S100 CERATECH

Rugged black polymer stock and matt grey Cerakote coating on the steel receiver and barrel turn the S 100 Ceratech into the perfect rifle for the demanding hunter who goes beyond his boundaries, braves wind and weather and poses highest requirements on his equipment.

S100 ATACAMA

The bright, digital camo pattern and the corrosion-resistant Cerakote coating in "Desert Sand" make the Atacama almost invisible in open terrain and a perfect companion for day-time and mountain hunting far away from dense vegetation.

S100 CHEROKEE

The dream of a perfectly camouflaged hunting rifle which resists all weather conditions comes true with the S100 Cherokee. Modern Woodland Digi Camo and the green Cerakote coating on all steel parts for utmost corrosion resistance make it the perfect choice for spot and stalk hunting.

J.P. SAUER & SOHN
ESTABLISHED 1751

SAUER 303
ELEGANT SPEED

When beaters are shouting and dogs are barking while shortly after boars are rushing out from underneath the thicket, it is time for the semi-automatic rifle S 303.

She is the unchallenged queen of efficient hunting. Like a double rifle, the S 303 provides the safe follow-up shot without manual reloading. Yet, she has even more to offer: The semi-automatic mechanism reduces recoil and muzzle flip by almost 30 percent while the precision remains unerring at all times. This makes the S 303 your first choice when a "good harvest" counts.

S 303 SYNCHRO XT ULTRA

With its robust and ergonomically sophisticated thumb-hole stock and adjustable comb, the S 303 Synchro XT Ultra impressively proves that an elegant hunting rifle does not necessarily need a wooden stock.

S303 CLASSIC XT

The S303 Classic XT is the basic version of the fastest Sauer rifle of all times and the ideal gateway into the world of efficient hunting.

S303 SYNCHRO XT

The thumbhole stock of the S303 Synchro XT and the infinitely adjustable stock allow for proper aiming, smooth swinging and accurate shooting. No matter whether you are on a driven hunt, stalking or in a high seat.

CARE & CLEANING KIT

Only the best for your S 303: Thanks to this cleaning kit you can give your S 303 the care it needs after tough use.

Find the detailed video clip on the perfect cleaning of your S 303 using the care and cleaning kit at www.sauer.de/303-reinigungsfilm

ISI-MOUNT SCOPE MOUNT

Especially designed for the S 303, the robust ISI MOUNT provides 100 % return to zero and is one of the lowest on the market.

SAUER 303 SHORT CASE

Due to a quickly and easily detachable butt stock, the Sauer S 303 is discreetly stowed in this robust and elegant ABS short case.

J.P. SAUER & SOHN
ESTABLISHED 1751

SAUER SHOTGUNS
MILESTONES OF FINE HUNTING

Since 1751, J.P. SAUER & SOHN
has inspired generations of hunters with true
milestones in the history of shotguns.

Be it the legendary Meisterwerk Shotgun at the end of the
19th century, the first almost completely machine-made
double-barrel hammer shotgun "Hérons" in 1925, the first
Sauer over and under shotgun of 1933 or the successful and
popular cooperation products with other gun manufacturers
between the 1960s and 1990s.

Until today, all these models are a synonym for hunting
shotguns of superior design. Following this tradition
Sauer & Sohn still presents a complete shotgun range
that fascinates huntresses and hunters equally through
uncompromising performance, unrivalled balance and
timeless beauty.

SAUER MEISTERWERK SHOTGUN

More than 100 years ago, J.P. SAUER & SOHN created a symbol of perfection – the Meisterwerk shotgun. The fine art of gunmaking brings this myth to life again. The original Sauer & Sohn sidelock is probably the only one of its kind which may call itself perfect. In cooperation with master gunsmith Marko Frühauf and master engraver Hendrik Frühauf a side by side shotgun was born, that does not need to compete with anything. Because it is the benchmark.

OVER AND UNDER SHOTGUN APOLLON 12

Only through the smart combination of premium materials, indestructible design and dynamic elegance, top-class over and under shotguns are born. If a sensational swing-through behaviour then meets an extremely crisp trigger, the formula for successful hunting is created or just simply called the Sauer Apollon.

Elegant stock made of walnut wood with laser grain finish

Powerful and safe ejectors

Prince of Wales pistol grip for instinctive handling

Selective single trigger with mechanic selector, trigger weight 1 800 to 2 200 g (3.9-4.8 lb)

Patented "Four Lock System" for maximum longevity

Steel shot proofed, soldered barrels with hard chromed bores and ventilated rib

5 exchangeable chokes included at delivery

Extremely reliable safety with integral barrel selector

OVER AND UNDER SHOTGUN APOLLON 20

This fine gun shoots with the emphasis of a 12 gauge but enables its shooter to be a true connoisseur of shotgun shooting. Finally Sauer & Sohn releases a real 20 gauge shotgun again, the action captivating with the distinctively sleek shape of the gauge. This is the epitome of noble shotgun shooting.

OVER AND UNDER SHOTGUN
ARTEMIS 12

The Sauer Artemis continues the success story of J.P. SAUER & SOHN's lady models. Outstanding shape and harmonious lines as well as the consequent adaptation of the stock dimensions to feminine physiognomy guarantee that "she" hits with "her."

710 mm (28") long barrels

Patented
"Four Lock System"

Selective single trigger with
mechanic selector, trigger
weight 1 800 to 2 200 g
(3.9-4.8 lb)

5 exchangeable chokes
included at delivery

Elegant distinguishing
feature: Monte Carlo
stock with red recoil pad
that is perfectly tailored
to ladies

Steel shot proofed,
soldered barrels with
hard chromed bores and
ventilated rib

Comfortable carrying and
shooting thanks to 2 700
grams (5.9 lb) overall weight

Special drop dimensions for ladies and the
noble laserline grain combine performance and
design at its best

OVER AND UNDER SHOTGUN
ARTEMIS 20

More streamlined and more elegant is hardly possible. With the Artemis 20, the claim of creating a true ladies' shotgun in regards to stock dimensions, weight, balance and low recoil becomes magnificent reality.

The Ergofit inlays allow to individually adjust drop and cast to both right- and left-handed shooters.

SEMI-AUTOMATIC SHOTGUN SL5

The moment a flight of ducks is crossing the sky in optimum shooting distance, all shotguns are mounted. Rapid shots make a trio of bright-feathered drakes fall from heaven. With the semi-auto shotgun SL5, triples are not left to chance. Sauer's youngest shotgun scion combines the power of a semi-automatic with the balance and "shootability" of a classic hunting shotgun. Finally its elegant design perfectly rounds off this "triad".

The sling swivels can easily be removed at the push of a button and provide that the rifle sling is stowed where it belongs: in the case.

SEMI-AUTOMATIC SHOTGUN SL5 INSTINCTIVE SPEED, TIMELESS ELEGANCE

The first semi-automatic shotgun by J.P. SAUER & SOHN is the best proof that a semi auto can be an eye-catcher. Just like the outer qualities, also the inner values are captivating: From recoil pad to muzzle all technical top features that make up a top-class shotgun are combined.

J.P. SAUER & SOHN
ESTABLISHED 1751

ACCESSORIES FOR PROFESSIONALS

**Your Sauer is more than just a firearm.
It is a statement of the way and manner you hunt.**

The original accessory range of J.P. SAUER & SOHN underlines the elegance and reliability of your Sauer. Premium products that do not only represent the character of your rifle or shotgun but above all their own. Of course in the well-known quality of Sauer & Sohn.

ERGO REST RIFLE SLING

Anti-slip, wide shoulder pad as well as soft, double-lined fore-end rest. Available in brown, green, black and orange with Sauer logo.

SCOPE MOUNT HEXA LOCK

The Sauer HexaLock is the ideal mount for the S100 and S101. A low profile, 100% return to zero and simple, comfortable operation.

RIFLE CASE CORDURA

Robust Cordura case for your Sauer rifle with separate pocket for further equipment.

RECOIL PAD

With all Sauer synthetic stocks you can choose between three recoil pads which of course can be retrofitted and make the rifle fit your individual body size. Above all the Speed Cap allows for fast mounting and a better shooting position with thick winter clothes.

Recoil pad Standard

Speed Cap

Recoil pad 35 mm

SILENCER TITANIUM PRO

Besides its outstanding technical characteristics, the Sauer silencer Titanium Pro stands out through its low weight, sleek and streamlined shape and convenient disassembly for easy cleaning and care.

MUZZLE THREAD AND MUZZLE BRAKE

A muzzle thread is optionally available for all Sauer rifles. Combined with the removable DUAL BRAKE muzzle brake the recoil is decreased while increasing shooting comfort and accuracy.

SAUER BORE BLITZ

The cleaning cord "to go". Just pull it two to three times through the barrel and it will shine like new.

OPEN SIGHTS

There are two different sights available for all Sauer rifles. Both sight options are adjustable for windage and elevation. The high-contrast "Semi Auto" cannot be beaten when used on driven hunts, while the black-on-black sights are the top choice for all-around utility.

CLASSY BLADES

Those hunting with a Sauer, hunt in style. With a Sauer hunting knife you can look after your game as classy as you have harvested it. As with the rifles, Sauer & Sohn also gives special attention to precise workmanship, premium quality and tasteful design when it comes to hunting knives.

HUNTING KNIFE STAG

10,0 cm (3,94 inch) long blade made of Sandvik 60 HRC steel. Real stag horn handle, matt finished silver plates incl. robust saddle leather sheath.

HUNTING KNIFE WALNUT

8,5 cm (3,47 inch) long drop point blade made of 440 stainless steel, with walnut grip plates and saddle leather sheath.

HUNTING SKINNER MOUFLON

Grip plates made of elegant mouflon horn, 7,5 cm (2,95 inch) blade in Sandvik 60 HRC steel, brown saddle leather sheath.

HUNTING SKINNER WALNUT

Hunting knife with skinning hook and 7,0 cm (2,76 inch) long 440 stainless steel blade, with walnut grip plates and saddle leather sheath.

J.P. SAUER & SOHN – MODEL GUIDE

SELECT –
designates a model featuring a walnut stock with laser grain.

CLASSIC –
designates a model featuring a classically sleek Sauer walnut stock grade 2.

ELEGANCE –
designates a model featuring a sleek Sauer walnut stock from grade 5.

CLASSIC XT –
designates a model with a Sauer stock made of high-strength and weatherproof polymer.

FOREST –
designates a model featuring a short 510 mm (20") barrel in Heavy contour (muzzle diameter 19 mm (.75")).

FOREST XT –
like the Forest, but featuring a polymer stock. The addition XT designates models with polymer stock in general.

SYNCHRO XT –
Synchro always means: thumbhole stock with adjustable comb. Together with the naming XT, this consequently is a thumbhole stock with adjustable comb made of polymer.

SYNCHRO XTC –
like the Synchro XT, the C additionally explains, that the "polymer stock" is made of real carbon.
